

Solar Hot Water System

Expansion Tank

BREATHE Systems® offers 18L and 24L Stainless Steel Expansion Tanks.

Expansion Tanks are necessary for a split solar hot water system as they absorb excess water pressure. As the water pressure rises in the expansion tank, it pushes against the diaphragm and gently compresses the air. The compression of the air cushions the pressure shock and relieves pressure in the system that could otherwise damage the system.

BREATHE Systems® Expansion Tanks conform to drinking water regulations and are capable of accommodating the required volume of water.

Models Available
BSS-SHWS-EXT18 (18L)
&
BSS-SHWS-EXT24 (24L)
